

Equities join global rally, Nifty ends above 10k-mark

FE BUREAU
Mumbai, June 3

FOR THE FIRST time after the rout in March, the Nifty on Wednesday ended the day above the psychologically crucial mark of 10,000, taking cues from other global markets. Indian equities have joined a strong global rally driven by a rush of liquidity. Expectations of more fiscal stimulus measures, hopes of a Covid vaccine and reopening of economies across the world buoyed markets. The banking and financial stocks, which had been hammered the most, were responsible for the markets rallying for the sixth straight session. Nifty Bank rose by 2% during the day's trading session.

marks losing some of the gains that they made during the trading session on profit booking. Last week, the Nifty was trading at the 9,000 mark but it has jumped by 1,032.5 points in seven trading sessions. Market experts believe that the swift rally in the Nifty is because Indian stock markets have started playing catch up with other global markets. Asian markets rose to a three month high during the day's trading session with bourses in Hong Kong, Taiwan and South Korea rallying between 1.73% to 2.87%. China's Shanghai Composite witnessed a flat trading session, rising by 0.07%

during the day. The European indices were also trading higher at the time of press, with stock markets in the United Kingdom, France and Germany rising between 1.28% to 2.3%. Compared to global markets, the Indian market continues to underperform but the extent of underperformance of the Indian markets has reduced. Ruskim Oza, executive vice president — head of fundamental research, Kotak Securities, said, "India barring Brazil is the only country where the cases of Covid-19 in spite of a lockdown have gone up, this had made investors wary and had caused the underperformance of the Indian markets. With India beginning to exit the lockdown, investors are taking it positively and foreign portfolio investor buying has resumed."

The premium that India was commanding over emerging markets (EMs) had gone down to 31% recently against the 10 year average of 38% and peaks of more than 60%. So far, since the start of the year, MSCI EM has seen a decline of 14.2%

outperforming the MSCI India which is down by 15.2% year-to-date. UR Bhat, director, Dalton Capital Advisors (India), said, "The markets are currently catching up with the other global markets but, if there is a slow and prolonged recovery in the Indian market, instead of a 'V' shaped recovery that the market is currently factoring, the India valuation premium over most other EMs can start contracting significantly. That said, if there is indeed a V-shaped recovery, the Indian market is likely to enjoy the premium over most other EMs."

Foreign portfolio investors have so far bought stocks worth \$2.9 billion since May 26 when the markets witnessed a steep upmove. Ahead of the weekly expiry on Thursday, the F&O segment saw volumes worth ₹17.25 lakh crore against the six month average of ₹13.9 lakh crore. On the other hand, the cash market saw volumes worth ₹65,871.9 crore against the six month average of ₹43,047.1 crore.

As coal demand falls, CIL limits mining to overburden removal

FE BUREAU
Kolkata, June 3

PSU MINER COAL India (CIL) has now limited mining only to overburden removal (OBR) with falling demand of coal. The mining behemoth is now keeping seams exposed removing the top soil so that coal can be extracted as soon as the demand picks up.

OBR is an integral part of coal mining and the first stage in the process. Through exposed seams it can be easily estimated how much of coal has actually been mined, a CIL official told *FE*. CIL has already been flushed with pit head stock and reserves at the power plants are at an all time high. As of April 1, this year, pit head stocks are 75 million tonne (MT) while reserves at power plants are 50 MT, maintaining over 30 days stock above the required level of 22 days as mandated by the Central Electricity Authority.

So, extracting further coal from the mines and creating a huge stock pile would endanger the mines with chances of catching fire.

So, CIL for now is only exposing seams keeping coal ready for extraction as soon as the demand picks up. The company has also started reporting growth in terms of OB removal. CIL has kept a target of producing 710 MT for FY 21, which is huge jump from the 602 MT it has achieved this fiscal.

CIL fell short of target by 58 MT during FY20 but in FY21 it wants to remain on target, for which it has concentrated on speedy OB removal, a CIL official said.

OB removal grew 10.4% during May, against OB removed during April this year, while production of coal and offtake grew 2.6% and 2.3%, respectively on a month-to-month basis. The miner as a whole produced 41.43 MT of coal in May compared to 40.38 MT in April.

ANRPC rolls back NR estimates, eyes slow price recovery

M SARITA VARMA
Thiruvananthapuram, June 3

DESPITE ITS OPTIMISM on demand, Association of Natural Rubber Producing Countries (ANRPC) has rolled back its estimate of global production and consumption of natural rubber (NR) for 2020. The Kuala Lumpur-based organisation's May estimate of NR production downsizes its own April estimate by 3,03,000 tonne.

As per the revised outlook, the world production is expected to fall by 4.7% to 13.130 million tonne during 2020.

"The recovery is likely to continue, albeit at slow pace and subject to a set of risk factors, said RB Premadasa, secretary general, ANRPC, in the forecast.

Market analysts at ANRPC list four reasons for "the positive sentiment" that drives the price recovery. One, the relaxing of lockdowns in several countries. Two, increasing optimism on Covid-19 vaccine. Three, increase in crude oil prices. Four, the substantial contraction in the world production estimates of NR in the first two quarters of the current year.

Adani Power hires merchant banker to evaluate equity delisting proposal

PRESS TRUST OF INDIA
New, Delhi, June 3

ADANI POWER BOARD on Wednesday appointed merchant banker Vivro Financial Services to evaluate the proposal to delist its equity shares from BSE and National Stock Exchange.

The board, in its meeting on Wednesday, appointed Vivro Financial Services, a Category-I Merchant Banker registered with the Securities and Exchange Board of India for evaluating delisting proposal, the company said in a BSE filing.

The board, in its meeting on Wednesday, also authorised certain identified personnel to provide all details and information to the merchant banker for carrying out due diligence on the delisting proposal.

It stated that after the receipt of the due diligence report from the merchant banker, the board will again meet to discuss the Delisting Proposal in detail.

Shares of the company dropped nearly 6% to ₹37.80 on BSE.

Earlier last week, the company had told bourses that one of its promoters, Adani Properties, has proposed volunteer delisting of the company shares.

In the delisting proposal, Adani Properties had expressed its intention either by itself or together with other members of the Promoter Group as the case may be to acquire all the equity shares of the Company, each equity share having face value of ₹10 held by the public shareholders of the company.

The promoter group collectively holds 2,89,16,12,567 equity shares of the company representing 74.97% of the paid-up equity share capital.
